

PRODUCT INFORMATION

Financial & Operational Restructuring

We deliver expert engineering support to keep your site compliant, efficient and on track. We're hands-on, fast-moving, and focused on results.

Restructuring Engineering Service

Purpose-built for fast results, clear insight, and measurable impact, our services empower financial stakeholders to make confident decisions, stabilise operations, and accelerate turnaround outcomes.

Administrator Support – Specialist technical input during restructuring

Asset Optimisation – Rapid studies to reduce cost

Due Diligence – Asset condition assessments

Interim Support – Experienced technical leaders

Risk & Compliance – Reviews to identify technical risks

Capability Reviews – Audits of systems and processes

► Engineering Certainty in Uncertain Times

We deliver a flexible, expert-led service model built for high-pressure restructuring environments. Our consultants combine deep technical expertise with commercial insight to provide fast, actionable guidance and hands-on support across technical operations, asset performance and compliance.

► Clarity, Control and Cost Savings

Our approach gives administrators and factory leaders the technical clarity and delivery capability they need to make confident decisions, reduce operational costs, and maintain continuity, without the burden of traditional consultancy models.

► Hands-On Support That Drives Results

We assess operations, unlock quick wins, and lead improvements, delivering compliance, continuity and cost savings.
